

BRAND & EXPERIENCE MANUAL · V4.0

SAGA

ARRIVE AHEAD　サーガ · 先回り　సాగా　VISAKHAPATNAM · NOV 2026

This manual sets out how SAGA looks, sounds, moves and makes money. It is the single reference for designers, developers, marketers and the operations team. The interactive app simulation is the working proof of every rule written here.

WHAT CHANGED IN V4

Black and blue heroes, live 3D, a real driver app.

TYPE

Inter Tight + JetBrains Mono

Inter Tight for every word people read; JetBrains Mono for live data such as ETA, battery, km, plates, codes and CO_2, so numbers read like instrument readouts.

COLOUR

Black #07080C with SAGA Blue #092EC9

Black and blue carry the heroes, the tab bar, the telemetry panels and the HUD. White stays the reading surface, so older riders can still read easily in daylight. Cyan #33C6F0 is reserved for live/tech moments.

ICONS

Lucide, one stroke

All interface icons come from Lucide 0.344 (2 px stroke) for one consistent, legible set.

MOTION

GSAP, purposeful and tech

Odometer-style digit rolls, route dash-flow, pin drops, radar lock-on, a receipt that prints, leaf particles and spring presses. Every animation is forced to its end state if frames stall, so screens are never left half-drawn.

LIVE 3D

Interactive service objects

The service cards now hold live Blender objects (blender/saga_modules_glb.py). You can drag them, and they react to the controls: day discs light up, the outstation route extends, the sun moves for each trip, and towers light up per car.

OPERATIONS

The driver starts the ride

The rider tells the pilot a 4-digit code and the pilot types it in the driver app. The rider's screen moves from On the way to At pickup to Ride started by itself. There is no "start ride" button for customers.

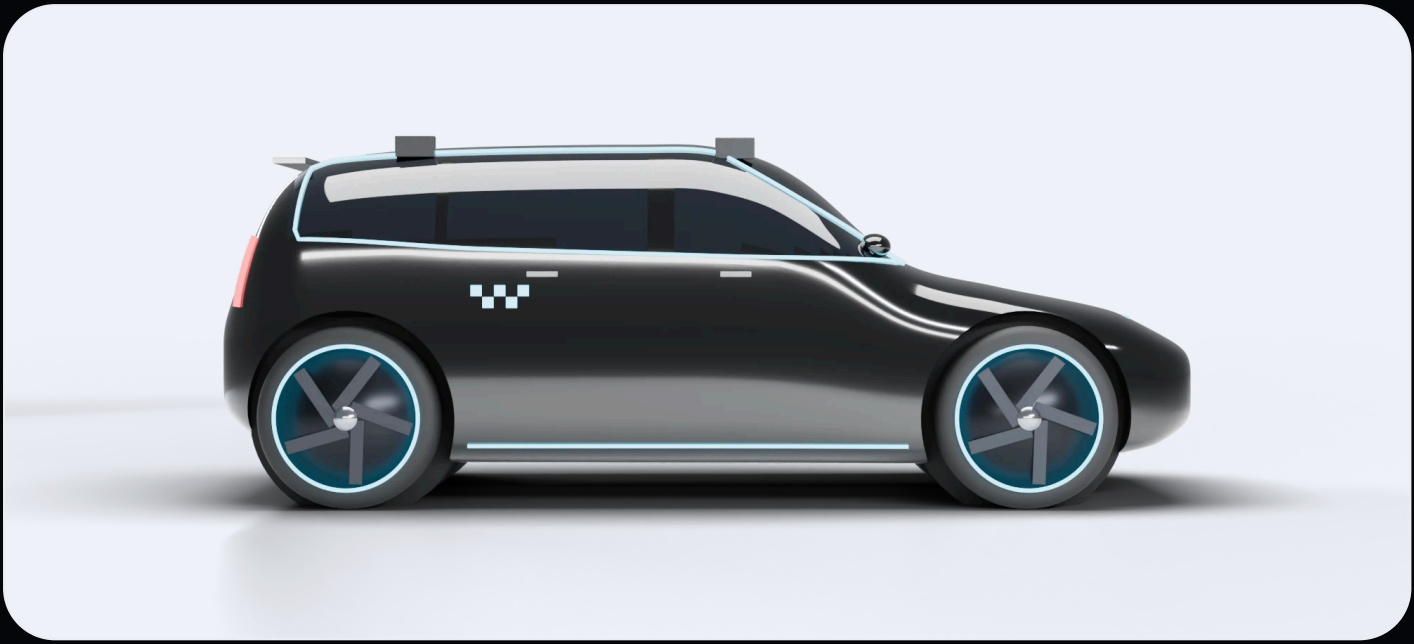

Driver app simulation: SAGA Pilot. Shift check, assigned job, 3D night navigation, trip-code keypad, live trip with a Secure 360 alert, charging and shift summary.

All three apps on one screen: SAGA Suite. Rider, driver and ops console side by side and linked live. A booking on the rider phone reaches Ravi's phone, and his acknowledge, arrival, code entry and trip end move the rider's screen and appear in ops.

SAGA Saathi, the voice assistant (rider app): a mic button opens a sheet in English, हिंदी or తెలుగు. Riders can book, confirm, track the car, book an airport ride from a PNR, set up daily rides, outstation, day trips and business rides, check green points, call the driver, cancel or send SOS, all by voice. The demo simulates the listening and understanding. In production, speech goes to Gemini (speech-to-text plus function calling) with the same intent list as tools, and it can only call the app's own actions. The driver app has no voice assistant by design.

WHAT CHANGED IN V3

Light, bold, ride-hailing first, built around the real car.

INTERFACE

Light theme, one blue

The rider app moves to a light, high-contrast interface for older riders. The brand blue is #092EC9, used as bold full-colour heroes (Pilo-style) and for every primary action. Type is Plus Jakarta Sans: 17 px body, 34 px headings, 800 weight for headlines.

HOME

A ride first

Home opens as a normal ride-hailing screen: a live map with SAGA cars moving nearby, "Where are you going?", and saved places. The other services sit below as swipeable cards with working controls inside: PNR, weekdays, distance slider, trip picker, people stepper.

VEHICLE

The real SAGA ONE

Remodelled in Blender from the sagamobility.com side profile: a compact 5-door EV hatchback, 4.27 m long, gloss black, with roof sensor pods, a cyan LED window outline and sill line, LED wheel rings, a checkered taxi mark and red vertical tail lights.

RIDE

Live 3D route

During the ride the app shows a light 3D city. The actual car model (exported as GLB) drives the route ribbon with turning wheels and a sensor pulse, while the HUD shows the next turn, arrival time, speed, battery and CO_2 saved.

TRUST

Know your car

Before pickup: number plate, colour and lights to look for, battery and range, the lifetime CO_2 this car has saved, features, the pilot, the trip code, and a rotatable 3D model of the car.

CARE

SAGA Assist

A ride type for older riders and families: the pilot helps with bags and boarding and waits longer. Sample price: +₹30.

A remarkable fleet behind an unremarkable brand.

SAGA has the hard parts already: an all-electric fleet with a distinctive light-line design, company-owned cars, salaried drivers and a low ₹18/km fare. What it lacks is a brand that tells anyone this. A review of the live product found these gaps:

TOUCHPOINT	WHAT WE FOUND	FIX
Play Store	Listed as "Saga Mobility" by an individual developer; the description calls it "Saga Rider". 10+ downloads, no reviews. Cash only for new bookings.	Move to an organisation developer account and name the app "SAGA". Use new screenshots from this system. Add UPI.
Website	Says the app is "coming soon" with no store links while the Android app is live. Describes the airport as Bhogapuram while the app says Visakhapatnam Airport.	Add the Play badge and use one name for the airport everywhere: "Bhogapuram International (Vizag)".
Product	A generic ride-hailing flow. Nothing uses SAGA's real advantages: owned fleet, payroll pilots, EV data.	Five modules built around pre-scheduling and reliability (chapter 11).
Identity	No logo system, palette, type or motion rules. The cars carry the only visual idea.	Make the car's light-line the root of the identity (chapters 05–10).
Data declaration	Declares precise location, contact details and device IDs as shared with third parties.	Audit the SDKs. If the data isn't actually shared, correct the declaration. It undermines a brand built on trust.

02 · POSITIONING

Not a cab app. The region's first predictive, electric mobility company.

先回り (sakimawari): to get there first, so everything is ready when the other person arrives.

This idea from Japanese hospitality sits at the centre of SAGA. Aggregator apps react: you ask, they search, you hope. SAGA anticipates. Your PNR, your weekly routine or your company's shift roster books the ride before you think about it. Owning the fleet and employing the pilots is what makes that promise possible, and no aggregator can copy it.

POSITIONING STATEMENT

For travellers, families and organisations across Visakhapatnam and its tier 2 and 3 towns, SAGA is the electric mobility company that plans your ride before you need it. Unlike aggregator apps, every SAGA car is company-owned and every pilot is a salaried employee, so pickups are locked, prices are flat and nobody gets stranded.

Brand pillars

ANTICIPATION

We move first.

PNR auto-booking, Loops and shift dispatch. The product earns trust by acting early and showing how it worked things out.

PURE ENERGY

Every km is electric.

The light is the brand. AURA turns each kilometre into CO_2 avoided that riders can see and spend.

QUIET PRECISION

Calm, exact, on time.

Like a Shinkansen conductor: no hype, no exclamation marks. Times to the minute, fares to the rupee.

COASTAL PRIDE

Built for Vizag first.

Eastern Ghats, the Bay of Bengal, Telugu first. Future-facing, and from here.

Who we serve

SEGMENT	JOB TO BE DONE	LEAD MODULE
Flyers	"Get me to Bhogapuram on time at 4 a.m. without worrying tonight."	Fly
Families & students	"Safe, same-driver school and college runs I can see live."	Loop + Campus
Professionals	"My office commute at a monthly price I know in advance."	Loop
Explorers	"Araku in a day, no bargaining, no planning."	Tales, Voyage
Organisations	"Move 100 people per shift with one invoice and ESG data."	Business

2.1 · HOW WE STAND OUT

Everyone sells a ride. We sell certainty.

Cab apps compete on price and the number of cars nearby. Autos compete on being right there. SAGA does not try to be the cheapest or the nearest. It is the ride you can plan your day around. Every feature below exists because SAGA owns its cars and employs its pilots, which no aggregator can copy without rebuilding its business.

WHAT PEOPLE WORRY ABOUT	TYPICAL CAB APP	AUTO-RICKSHAW	SAGA
Will the ride turn up?	Drivers can reject or cancel	Bargain at the roadside	**Assigned, not auctioned.** Salaried pilots cannot refuse a job.
What will it cost?	Surge pricing at peaks and in the rain	Depends on the day and the driver	**₹18 per km, every hour of every day.** No surge, ever.
Is it safe?	Varies by driver	No tracking	**Secure 360**: road camera, pilot attention alerts reviewed by people, SOS, live trip sharing, trip code.
Will I miss my flight?	Book and hope at 4 a.m.	Not available	**SAGA Fly** books from your PNR and moves the pickup if your flight moves.
Is the car decent?	Any car, any condition	Open, noisy, hot	**One clean, quiet, electric SAGA ONE**, checked before every shift.
Is it good for the city?	Mostly diesel and petrol	Mostly CNG and petrol	**100% electric.** You see the CO_2 you saved after every ride.
Can my parents use it?	Small text, many steps	Yes, but no tracking	**Large text, one button per screen, voice in Telugu and Hindi**, and SAGA Assist for help with bags and boarding.

Six features that make the difference

01 · SAGA FLY

Book from your ticket

Type the PNR once. SAGA reads the flight, times the pickup, and moves it if the flight is late.

02 · ASSIGNED RIDES

No cancellations

Dispatch assigns every ride to a salaried pilot. Riders never see "searching for drivers" fail.

03 · FLAT FARE

₹18 per km, always

The fare on the screen before you book is the fare you pay. Rain, festivals and midnight included.

04 · SECURE 360

Safety you can see

The pilot starts the ride only after your trip code. Alerts are reviewed by a person, never by AI alone.

05 · SAGA SAATHI

Book by voice

Speak in Telugu, Hindi or English. Built for people who find apps hard, not just people who find typing slow.

06 · AURA

See the good you do

Every ride shows the CO_2 you avoided. Green points add up to free rides.

2.2 · CLEAR MESSAGING

One promise, four proofs, said the same way everywhere.

Every campaign, store listing, push message and sales deck hangs from the same message house. If a line cannot be traced to one of the four proofs, it does not run.

THE PROMISE

Arrive ahead.

SAGA plans your ride before you need it, so you get there calm, on time and without surprises.

RELIABLE

It always turns up.

Owned cars, salaried pilots, assigned rides. 98% of pickups on time.

FAIR

The price never jumps.

₹18 per km at any hour. No surge, no bargaining, no hidden fees.

SAFE

Someone is watching out.

Secure 360, trip codes, live sharing, SOS, trained pilots.

CLEAN

Every km is electric.

Quiet cars, cleaner air, and the CO_2 you saved on every receipt.

Lines we use

USE	ENGLISH	TELUGU
Master line	Arrive ahead.	ముందే చేరుకోండి.
Reliability	The cab that doesn't cancel.	క్యాన్సిల్ చేయని క్యాబ్.
Price	₹18 a km. Rain or shine.	కి.మీకి ₹18. వాన వచ్చినా, ఎండ కాసినా.
Airport	Give us your PNR. We'll handle the 4 a.m.	మీ PNR ఇవ్వండి. తెల్లవారుజాము 4 గంటల బాధ్యత మాది.
Safety	Your ride starts only when you say the code.	మీరు కోడ్ చెప్పినప్పుడే రైడ్ మొదలవుతుంది.
Electric	Quiet ride. Clean air. Same price.	నిశ్శబ్ద ప్రయాణం. స్వచ్ఛమైన గాలి. అదే ధర.

ALWAYS

Lead with the benefit, then the proof. Use real numbers: minutes, rupees, kilometres. Show the real car and real pilots. Say "electric" plainly.

NEVER

"Cheapest in town", "India's no. 1", "revolutionary", "AI-powered" as a headline, stock photos of cars that aren't ours, or attacking competitors by name.

2.3 · WHERE WE'RE HEADED

From a cab service to the way the coast moves.

The long-term direction is a predictive mobility network for Andhra Pradesh's coastal cities and the towns around them. Every step builds on the same three assets: owned electric cars, employed pilots, and data that lets us plan rides before people ask.

NOW · 2026–27

The most trusted ride in Vizag

Airport, daily rides and business accounts. 200 cars. Voice booking in three languages. On-time above 98%.

NEXT · 2027–28

Across the coast

Kakinada, Rajahmundry, Vizianagaram and Srikakulam. Intercity Voyages with planned charging. Hospital and campus partnerships.

LATER · 2029+

A mobility network

Shared shuttles on predicted routes, connections to rail and buses, and fleet charging that also supports the grid. Ready for driver-assist technology, with pilots kept in the car.

What will not change: flat, fair fares, salaried pilots, people reviewing safety decisions, and an app a 70-year-old can use alone.

2.4 · AUDIENCES & PERSONAS

Seven people we design and write for.

Each persona is a composite drawn from the segments in chapter 02. Campaigns, screens and support scripts should name which persona they are for.

AR

Ananya, 31

THE EARLY FLYER · MVP COLONY

LIFE

Pharma sales manager. Flies to Hyderabad and Bengaluru twice a month, often on the first flight.

WANTS

To sleep the night before a 6 a.m. flight without worrying about the cab.

FRUSTRATIONS

Cancelled bookings at 4 a.m., surge pricing, drivers asking for directions.

WHAT SAGA OFFERS

SAGA Fly, Comfort, business invoices.

CHANNEL

App push, Google search, LinkedIn. English.

"Give us your PNR. We'll handle the 4 a.m."

VR

Venkata Rao, 68

THE CAREFUL ELDER · SEETHAMMADHARA

LIFE

Retired bank officer. Visits the doctor weekly and the temple on Saturdays. Children live abroad.

WANTS

To get around independently, with someone trustworthy and a fare that is easy to understand.

FRUSTRATIONS

Small text, English-only apps, being rushed, autos that overcharge.

WHAT SAGA OFFERS

Voice booking in Telugu, SAGA Assist, the same pilot each week.

CHANNEL

WhatsApp, phone support, family setting it up, newspapers. Telugu.

"మీరు మాట్లాడితే చాలు. మిగతాది మేం చూసుకుంటాం." (Just speak. We'll take care of the rest.)

LN

Lakshmi, 38

THE PLANNING PARENT · MADHURAWADA

LIFE

Works in a bank. Two children at school 7 km away. Juggles drop-offs and tuition.

WANTS

A safe, same-pilot school run to watch live from work.

FRUSTRATIONS

Not knowing who is driving the children. Vans that are late or crowded.

WHAT SAGA OFFERS

SAGA Loop, live sharing, trip codes, monthly price.

CHANNEL

WhatsApp groups, Instagram reels, school partnerships. Telugu and English.

"Same pilot. Same time. You see every km."

AK

Arjun, 21

THE STUDENT · GAJUWAKA

LIFE

Engineering student. Travels to college, part-time work and weekend outings with friends.

WANTS

A fair price, and a brand that matches personal values on climate.

FRUSTRATIONS

Surge pricing on weekend nights, bargaining with autos.

WHAT SAGA OFFERS

Flat fares, green points towards free rides, splitting a Tales trip with friends.

CHANNEL

Instagram, YouTube Shorts, campus ambassadors, referrals. English and Telugu.

"Same fare at midnight. Free rides from your CO_2."

MT

Meghana, 34

THE COMPANY BUYER · RUSHIKONDA IT PARK

LIFE

HR and admin lead for 600 staff working in shifts, including women on night shifts.

WANTS

Safe shift transport, one monthly invoice and emissions data for the ESG report.

FRUSTRATIONS

Vendors who don't show up, manual rosters, safety complaints.

WHAT SAGA OFFERS

SAGA Business, roster upload, Secure 360 reports, CO_2 data.

CHANNEL

Sales meetings, LinkedIn, industry events, case studies. English.

"Upload the roster. Every employee home safe, one invoice."

RS

Rohit & family, 42

THE WEEKEND EXPLORER · FROM HYDERABAD

LIFE

Visits Vizag twice a year with family. Wants to see Araku and the beaches.

WANTS

A planned day with a pilot who knows the route, without bargaining.

FRUSTRATIONS

Taxi operators quoting different prices, unsafe ghat drivers.

WHAT SAGA OFFERS

SAGA Tales day trips, airport pickup, Voyage.

CHANNEL

Google search, Meta ads on travel intent, hotel partners. English and Hindi.

"Araku in a day. One price, all-inclusive."

SK

Suresh, 45

THE FIRST-TIMER · ANAKAPALLI

LIFE

Runs a hardware shop in a tier 3 town. Has a smartphone but uses mainly WhatsApp and YouTube.

WANTS

To reach the city hospital or railway station without hiring a car for the day.

FRUSTRATIONS

Apps that ask for too much, unclear prices, not knowing if anyone will come.

WHAT SAGA OFFERS

Voice booking, call-to-book, cash or UPI, a fare shown before booking.

CHANNEL

WhatsApp, local cable TV, posters at bus stands and pharmacies. Telugu.

"ఒక్క కాల్. ధర ముందే తెలుస్తుంది." (One call. You know the price first.)

+

Inside SAGA

PILOTS AND STAFF

Pilots are an audience too. Ravi, 34, a former auto driver, joined SAGA for a fixed salary, weekends off and respect. Speak to pilots as professionals: "Pilot", never "driver partner". Recognise safe driving publicly. Every rule in this manual applies to how we speak to our own people.

How the message shifts by audience

AUDIENCE	LEAD WITH	TONE	LANGUAGE	MAIN CHANNELS
Frequent flyers	Never miss a flight	Crisp, time-exact	English	App, Google search, LinkedIn
Elders	Easy, safe, someone to help	Patient, respectful, warm	Telugu first	WhatsApp, phone, print
Parents	Same pilot, live tracking	Reassuring, specific	Telugu and English	WhatsApp, Instagram, schools
Students	Fair price, green points	Light, a little playful	English and Telugu	Instagram, YouTube Shorts, campus
Companies	Safety, one invoice, ESG data	Professional, evidence-led	English	Sales, LinkedIn, case studies
Tourists	A planned day, one price	Inviting, local pride	English and Hindi	Google, Meta, hotels
Tier 2 and 3 towns	A fare you know before you go	Simple, neighbourly	Telugu	WhatsApp, cable TV, posters

One master brand, short product words.

SAGA is always the hero. Each product is a single plain English word that describes the job, so it reads at a glance on a 6-inch screen and translates cleanly into Telugu.

NAME	WHAT IT IS	USE AS
SAGA Fly	Airport rides booked automatically from a PNR	"Book with SAGA Fly"
SAGA Loop	Recurring rides: school, college, office	"Start a Loop"
SAGA Voyage	Long-distance and intercity, charge-planned	"Plan a Voyage"
SAGA Tales	Curated end-to-end itineraries	"The Araku Valley Tale"
SAGA Business / Campus	Bulk booking for companies and institutions	"SAGA Business for Vizag Pharma Park"
AURA ◈	CO_2-avoided rewards currency	"+30 ◈ AURA"
Secure 360	Safety system: road camera, pilot attention, SOS	"Secure 360 on"
SAGA Pilots	Salaried, trained drivers. Never call them "drivers" in UI or marketing.	"Your SAGA Pilot, Ravi"
SAGA ONE	The vehicle platform and livery name	"SAGA ONE · AP 39 EV 2147"

04 · PERSONALITY

A calm navigator with a warm heart.

If SAGA were a person, it would be the friend who works in air traffic control: always a step ahead, quietly technical, never showing off, and the first to call when something changes. The technology is real and visible, but it is always in service of a person getting somewhere safely and on time.

Futuristic in what we build. Human in how we speak.

Character traits

ANTICIPATING

One step ahead

Tells you before you have to ask: the flight is late, the pickup has moved, your car is charged.

CALM

Never in a hurry

No exclamation marks, no countdown pressure, no "hurry, offer ends soon".

EXACT

Numbers, not adjectives

"Arriving in 4 min", "₹749", "3.0 kg CO_2 saved". Precision is how we show respect.

WARM

Like family who drives

Greets by name, remembers that you prefer AC, and checks you got home.

HONEST

Owns mistakes

If we're late, we say so first, explain why in one line, and make it right.

LOCAL

From the coast

Telugu first, knows the city by its landmarks, proud of Vizag without being loud about it.

Where we sit

Futuristic — Traditional

Technical — Plain-spoken

Serious — Playful

Reserved — Warm

Premium — Everyday

WE ARE	WE ARE NOT
Confident	Arrogant or boastful
Advanced	Cold, robotic or full of jargon
Caring	Sugary or over-familiar
Premium in quality	Expensive or exclusive
Proudly local	Small-town or parochial

One voice. The tone changes with the moment.

Our voice never changes: calm, exact, warm. Our tone adjusts to what the person is going through. A booking confirmation can smile; a safety message must not.

Four voice rules

1 · SAY THE FACT FIRST

"Pickup moved to 04:42. Your flight is 25 min late."

Not: "Good news! We've got an update about your ride…"

2 · SPEAK TO ONE PERSON

"Ravi is at Gate 2."

Not: "Your driver partner has arrived at the pickup location."

3 · SHORT, THEN SHORTER

Under 12 words for a headline, under 25 for a message. One idea per sentence.

4 · SAME WORDS EVERYWHERE

"Trip code", "Pilot", "Green points". The same term in the app, on WhatsApp, on the phone and on the car.

Tone by moment

MOMENT	TONE	EXAMPLE
Booking confirmed	Reassuring, quietly pleased	"Done. Ravi will pick you up at 04:17. Sleep well."
Waiting	Informative, live	"Ravi is 3 min away. Black SAGA ONE, AP 39 EV 2147."
Something changed	Proactive, solution first	"Your flight is 25 min late, so we moved your pickup to 04:42. Nothing to do."
We got it wrong	Honest, accountable, brief	"We're sorry, we were 8 min late today. ₹50 is back in your wallet."
Safety	Serious, clear, no branding	"SOS received. Our safety team is calling you now. Stay on the line."
Celebration	Warm, a little proud	"100 rides with SAGA. You've saved 62 kg of CO_2. Thank you."
Payment	Plain, transparent	"₹749 paid by UPI. 41.6 km × ₹18 – ₹0 discounts."
Marketing	Inviting, never pushy	"Araku this Sunday? A full day for ₹4,140, back by 8 p.m."

Words we use and avoid

USE

Pilot · trip code · pickup · arrive · planned · electric · green points · on time · we're sorry · thank you

AVOID

Driver partner · surge · oops · uh-oh · hurry · limited time · AI-powered (in headlines) · revolutionary · emoji in product UI · ALL CAPS shouting

Three languages, one voice

Telugu, Hindi and English are written, not machine-translated. Telugu copy uses everyday spoken Telugu, not formal textbook Telugu. Respectful forms are the default (మీరు, आप). Numbers, times and prices stay in Western digits in every language so they are easy to scan.

Loaded with technology. Led by people.

SAGA uses AI, live 3D, voice and cameras. That only builds trust if people can see that the technology works for them and not on them. Three commitments keep the brand ethical, emotional and relatable.

ETHICAL

Fair by design

- Pilots are salaried employees with weekends off, not gig workers chasing incentives.
- No surge pricing. The fare does not rise when people need us most.
- Safety alerts are always reviewed by a person. Pilots see their own alerts and can explain.
- Data is used to plan rides, not sold. Camera footage is deleted after 7 days unless an incident is open.
- The voice assistant can only do things inside the app, and always confirms before booking or paying.

EMOTIONAL

Moments, not transactions

- The calm of knowing the 4 a.m. airport ride is handled.
- A parent watching the school run arrive, live.
- A grandparent booking alone, in Telugu, by voice.
- A pilot proud of a safety bonus and a 4.96 rating.
- Seeing the CO_2 you saved, ride after ride.

RELATABLE

Of this place, for these people

- Landmarks, not coordinates: "Gate 2, near the temple".
- Real pilots and real riders in campaigns, never stock models.
- Prices compared to everyday life: "less than an auto at night".
- Festivals, monsoon, exam season and the early-flight life are in our stories.
- Tech explained the way you'd explain it to your parents.

How we talk about technology

FEATURE	DON'T SAY	SAY
AI dispatch	"AI-optimised predictive allocation engine"	"We plan your ride before you ask, so it's ready on time."
Secure 360	"Driver monitoring system"	"A road camera and attention alerts help our pilots stay focused. People review every alert."
Voice assistant	"Gemini-powered conversational AI"	"Just tell SAGA where you want to go, in Telugu, Hindi or English."
Live 3D	"Real-time 3D digital twin"	"Watch your car arrive, and see the route ahead."
Electric fleet	"Zero-emission sustainable mobility solutions"	"Every SAGA car is electric. Quieter rides, cleaner air."

4.3 · NOTIFICATIONS

Fewer messages. Each one useful.

Every notification must answer one question the rider would otherwise have to ask. If it doesn't, we don't send it.

RULES

- Title: the fact, under 40 characters. Body: what it means and what to do, under 90.
- Times, plates and prices in numbers.
- Ride messages are never mixed with offers.
- No marketing between 9 p.m. and 8 a.m., and at most 2 offers a week.
- Every message opens the exact screen it is about.
- Sent in the rider's chosen language.

PRIORITY

- **Critical**, safety and SOS: push, SMS and a phone call, sound on.
- **Ride**, pickup and arrival: push and live activity on the lock screen.
- **Planned**, reminders and flight changes: push and WhatsApp.
- **Account**, receipts and points: in-app and email.
- **Offers**: in-app and WhatsApp only, opt-in.

SAGA · NOW

Ride booked for 04:17

Ravi will pick you up at MVP Colony, Gate 2. Sleep well.

ఈ ఆదివారం అరకు? రోజంతా ట్రిప్ ₹4,140, రాత్రి 8 కల్లా తిరిగి.

OFFER · OPT-IN

Pilot notifications

Pilots get the same calm, but even shorter, because they read while working. Job messages are spoken aloud and need one tap. Example: "New job: Ananya R., MVP Colony Gate 2, pickup 04:17. Tap to acknowledge." No ratings or performance messages while driving; those wait for the end of the shift.

The same SAGA in every place you meet us.

Whether someone reads a push message, chats on WhatsApp, calls support or sees a poster at a bus stand, it should feel like the same calm, exact, warm company.

CHANNEL	PURPOSE	HOW WE SOUND	EXAMPLE
App	Book, track, pay	Shortest form, numbers first	"Ravi is 4 min away."
Voice (SAGA Saathi)	Book and ask by speaking	Friendly, confirms before acting	"Route to RK Beach is ready, ₹155. Shall I book it?"
WhatsApp	Reminders, receipts, support	Conversational, still short	"Your Loop starts Monday at 07:30. Reply 1 to pause a day."
SMS	Backup for critical and ride messages	Bare facts	"SAGA: Ravi, AP39EV2147, arriving 04:17. Code 4827."
Phone support	Help, elders, complaints	Patient, never scripted-sounding, Telugu first	"Namaskaram, this is Divya from SAGA. How can I help?"
Email	Invoices, business reports	Professional, structured	"Your November statement: 1,284 rides, ₹4.2 L, 2.1 t CO_2 avoided."
Social	Stories, pilots, the city	Warm, local, human faces	"Meet Ravi. 6 years on Vizag roads, 4.96 stars, never late for a 4 a.m. flight."
In the car	Welcome, safety, feedback	Quiet; screen and voice, no ads during the first minute	"Welcome, Ananya. AC is set to 24°. Seatbelt, please."
Outdoor and print	Awareness	One idea, big type, the car	"₹18 a km. Rain or shine." + the SAGA ONE
Crisis and press	Incidents, outages	Facts, responsibility, next steps, within 1 hour	"At 18:40 our app was down for 22 min. All booked rides ran. Here's what we changed."

DO

Use the rider's name and their language. Tell them what happens next. Close the loop: "Your issue is fixed" beats "Ticket closed".

DON'T

Send the same message on three channels at once, use copy-paste apologies, or reply only in English to a Telugu message.

05 · USABLE BY EVERYONE

Striking to look at. Effortless to use, at any age.

SAGA serves first-time app users in tier 2 and 3 towns as much as frequent flyers. Visual ambition lives in the 3D renders and motion. The interface itself stays plain, large and obvious. If a grandparent can book an airport ride on their own, the design is working.

RULE	STANDARD
Text size	Body 16 px minimum, labels 14 px, headings 34 px. Never use grey text below 4.5:1 contrast.
Touch targets	56 px minimum height for buttons and list rows. Primary button 60 px, full width.
Say what it does	A plain name first, the brand name second: "Airport rides · SAGA Fly", "Daily rides · SAGA Loop", "Green points (AURA)".
Explain jargon	"Ticket number (PNR), the 6-letter code on your ticket." "Trip code: share it with your driver at pickup."
One main action	Each screen has one blue button. Everything else is secondary grey.
Labels always visible	Tab bar shows icon and word together. No icon-only navigation.
Help in reach	"Talk to a person" on Home and SOS on every live ride, in Telugu, Hindi and English.
Motion with purpose	Animations show where things came from or that something worked. Every one has a reduced-motion fallback.

The racetrack S: two lanes, one turn back, an arrival node.

The monogram is drawn as a single continuous lane, the same line of light that runs along the SAGA ONE's body. It turns back on itself twice, like a road through the Ghats, and ends one beat before a node: the pickup point, reached ahead of time. The wordmark SΛGΛ drops the crossbars from the A's, so the letters read as forward chevrons.

SAGA

సాగా

- **Clear space:** one stroke width (13 units) on every side of the monogram; the cap height of the A on every side of the wordmark.
- **Minimum size:** monogram 16 px / 5 mm; wordmark 64 px / 18 mm wide.
- **The node is always a solid circle**, never a ring, and always white or Plasma on dark.
- **3D version:** glass tube with a Plasma core, rendered from the master file. Use it for hero moments only, never below 120 px.

Misuse

07 · COLOUR

Void black, rich blue, and light.

The palette is the night road with the car's light running through it. Silver appears only as titanium: hardware, hairlines and secondary text. It is never a fill. Light is used sparingly, so when it appears it means something.

Void
#05060A · base 70%

Carbon
#0B0E16 · surfaces

SAGA Blue
#092EC9 · brand, actions, heroes

Ion
#4D8DFF · secondary light

Plasma
#7FE6FF · 3D LED accents only

Titanium
#C9CED8 · hairlines, metal

Signal White
#EEF1F7 · text

Live
#3DDC97 · on time, ready, on duty

Ratio per screen: 70 void · 18 graphite surfaces · 8 SAGA Blue · 3 live green · 1 Titanium.
On screens, SAGA Blue renders as #2F54FF for legibility on black. Alerts and SOS use #FF6B81.

Ion Trail gradient

Void → SAGA Blue → Ion → Plasma → white. Used for the monogram, progress bars and light trails. It always runs in the direction of travel: left to right, or bottom to top.

08 · TYPOGRAPHY

One family, used with confidence.

DISPLAY
Geist 500 · tight tracking

You arrived ahead.

INTERFACE & BODY
Geist 400–600

Pickup locked for Thursday at 04:17 from MVP Colony. Your SAGA Pilot is assigned at 03:47.

DATA & LABELS
Geist Mono 400–500 · tracked +0.2em caps

6E 2147 · VTZ 07:25 → BLR 09:05 · ₹18/KM

ACCENT
Zen Kaku Gothic New · Noto Sans Telugu

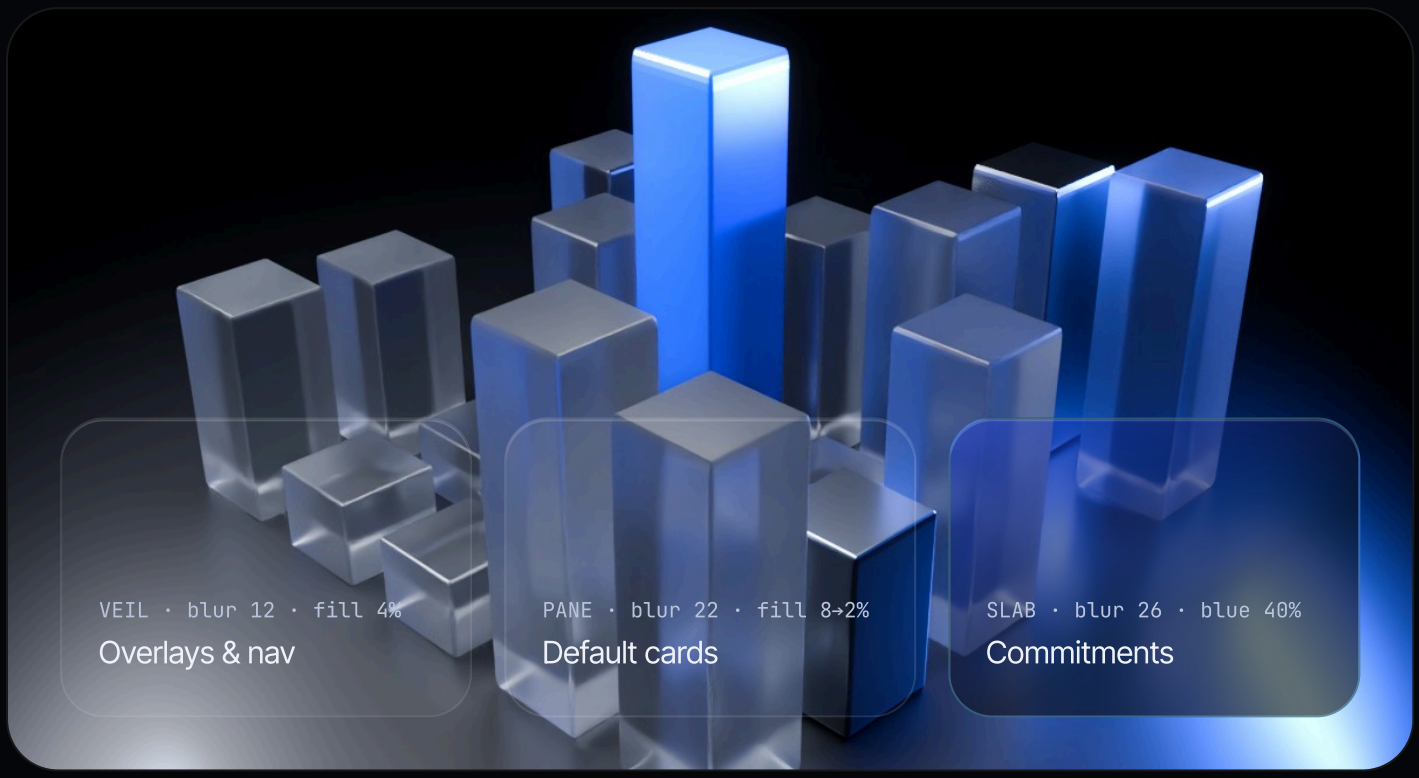

サ ー ガ　先 回 り　మీ రైడ్ ముందే సిద్ధం

Scale (px): 64 · 40 · 34 · 20 · 17.5 · 16 · 14. Headlines use tight negative tracking. Geist Mono only for codes: PNR, trip code, number plate. Telugu UI uses Noto Sans Telugu at 1.1× the Latin size for equal visual weight.

09 · GLASS SYSTEM

Three thicknesses of glass, each with a job.

v2 uses glass sparingly: only for layers that float over content, such as the tab bar, the map sheet and toasts. Everything else is a flat graphite card with a hairline edge, which is calmer and easier to read.

- **Veil** is for things that float: tab bar, map chips, toasts.
- **Pane** is for information: trip cards, KPIs, settings. It catches a moving highlight under the pointer or finger.
- **Slab** is for money and commitments: fares, ride pass, monthly estimates. If a screen has a Slab, it has only one.
- Never stack more than two layers of glass. Text on glass must reach a 4.5:1 contrast ratio. Test it on the brightest frame of the render behind.
- Edges: 1 px Titanium at 11%, an inner top highlight at 16%, radius 22 px for cards and 18 px for buttons.

One studio-lit object per product, made in Blender.

v2 replaces the neon grid with a product-photography studio: a satin graphite floor falling off into black, one soft overhead light, frosted glass, satin titanium and a single blue element per object. Light-lines appear only as small LED signatures on the car. Each product keeps its own object, so a glance at the hero tells you where you are.

Render recipe

SOURCE	`blender/saga_car_v3.py` builds the real SAGA ONE, renders transparent front, side, rear and top views, and exports `saga_one.glb` for the app. `saga_modules_light.py` renders the service objects as transparent cut-outs for the light UI.
ENGINE	Cycles, GPU (OptiX), 112–192 samples, denoised. AgX view transform, Medium High Contrast look.
MATERIALS	Frosted glass (roughness 0.2–0.3) · Midnight clear-coat paint · satin Titanium · one satin SAGA Blue part. Emission scaled to 20%, used only for car LEDs and small cores.
GROUND	Seamless studio floor: satin graphite with a radial falloff into the black background.
CAMERA	35–58 mm, slightly above the eye line. One hero object, centred or on the right third.
POST	Light bloom on highlights only (threshold 0.7, strength 0.3), exported as JPEG on black. In the UI, fade with a vertical mask.

Four verbs: anticipate, glide, lock, glow.

Anticipate

`stagger 70ms · rise 800ms`

Content arrives in order before you look for it.

Glide

`cubic-bezier(.22,1,.36,1)`

All travel: screens, cards, the car. Fast start, long settle.

Lock

`cubic-bezier(.7,0,.2,1)`

Commitments: slide to lock, ring draw, wordmark draw.

Glow

`pulse 2s · bloom`

Live state: the pilot moving, a pickup pin, AURA earned.

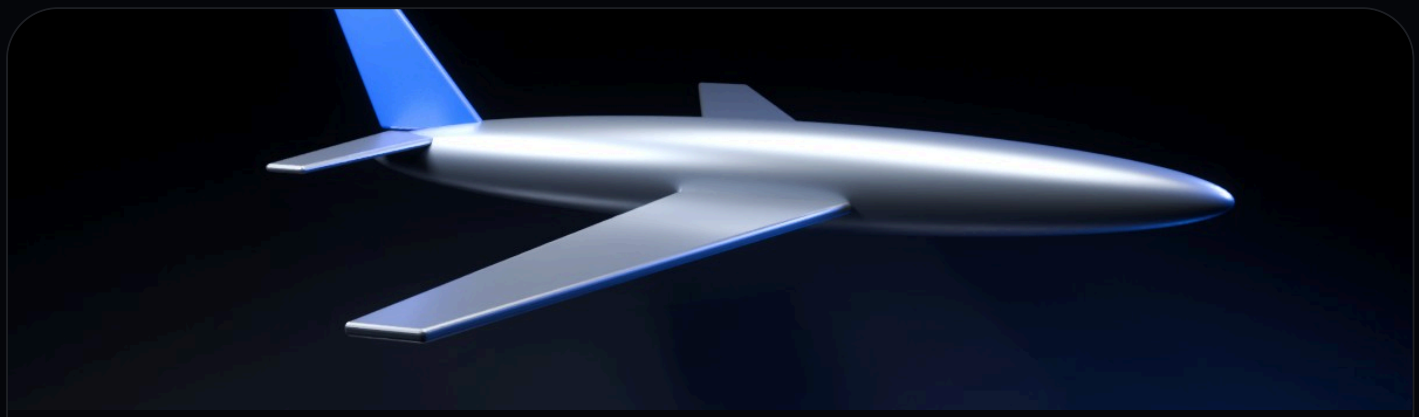

Signature moments

MOMENT	SPEC
Welcome	Mark and wordmark rise 10 px and fade in over 0.9 s. The car slides in 24 px from the left as if arriving.
Car drive-in (Home)	The hero car glides in 60 px over 1.4 s. A slow light sheen crosses the next-trip card every 5 s.
Morph (tile → module)	Shared-element view transition, 700 ms glide. The old screen blurs out at 97% scale.
Reading your booking	A thin progress bar fills as four checks complete 700 ms apart, then the plan opens on its own.
Slide to lock	The thumb follows the finger. Past 85% it snaps to the end and confirms. Otherwise it springs back in 500 ms.
Route draw	Stroke-dashoffset over 2.4 s with lock easing. The car marker follows the same path.
AURA earned	The counter springs up over 1.4 s (quartic ease-out). Bars rise 60 ms apart.

Every motion has a reduced-motion fallback that jumps straight to the end state. Nothing important is ever hidden behind an animation.

Five business models, one promise: the ride is ready before you are.

The owned fleet and payroll pilots are what make pre-scheduling reliable. Every scheduled ride also feeds the fleet planner, so SAGA knows tomorrow's demand tonight. That lets it position cars, plan charging and staff shifts ahead of time.

01 · SAGA FLY

PNR in. Pickup locked.

Enter PNR + last name → | Flight found → | Pickup computed → | Slide to lock → | Pilot assigned T−30 → | Flight watch

```
pickup = departure - check-in lead (2 h domestic / 3 h intl) - p85 drive time - buffer (10–20 min by hour & weather)
```

ARRIVALS	The pilot is dispatched to arrive at landing time + bag time (≈ 15 min domestic) and tracks the live ETA. Free waiting time to be set by ops.
RE-PLAN	Delay over 15 min, gate or terminal change, or a traffic shift of more than 8 min. The rider gets one calm message with the new time.
DATA	PNR lookup through an airline data aggregator API. Fallbacks: forward the e-ticket email, or scan the boarding pass. Provider is an open decision.
MEASURE	Share of airport rides booked by PNR · on-time pickup % · missed-flight incidents (target 0).

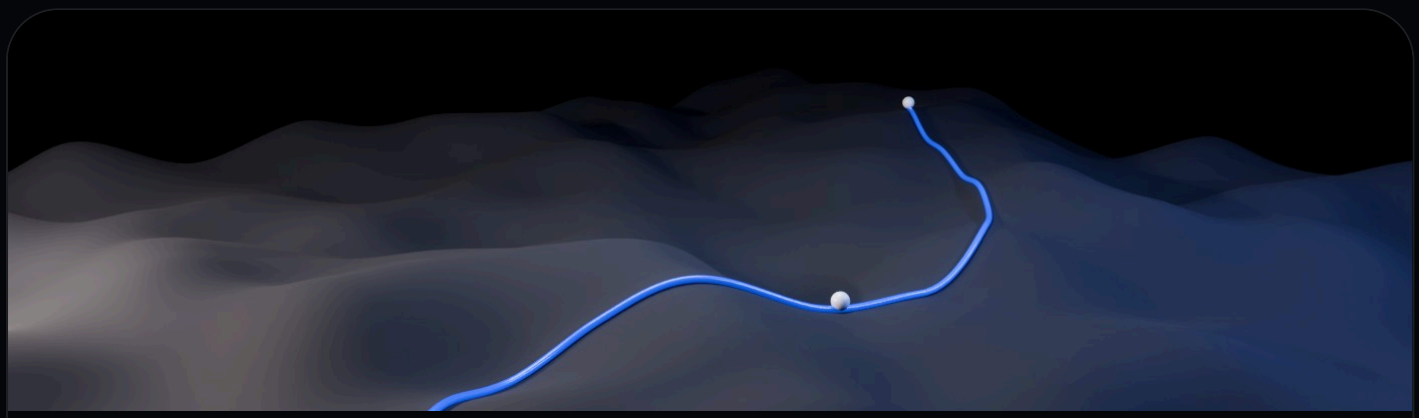

02 · SAGA LOOP

Your routine, on a loop.

Preset: office / school / college → | Days & times → | Monthly estimate → | Prepay → | Same pilot daily

```
monthly = round(days/week × 52 ÷ 12) × legs × km × ₹18 × (1 - loop discount)
```

RULES	Skip or pause a day by 21:00 the night before for a credit. The same pilot and car are guaranteed when available, with a named backup pilot.
CAMPUS	Guardian live view, boarding and drop confirmed by OTP, and a notification at each event.
OPEN	The prototype uses a −12% Loop discount. Confirm against fleet economics.
MEASURE	Loop retention at 3 months · fleet hours sold ahead · on-time %.

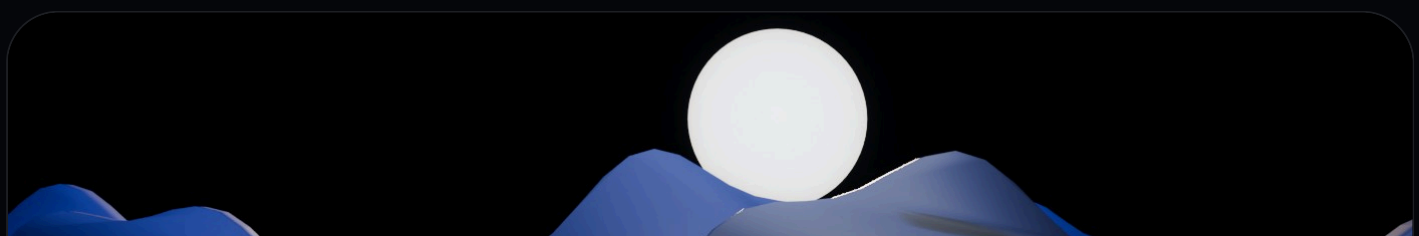

03 · SAGA VOYAGE

Long roads, planned to the charge.

From / to → | Auto charge stops → | Battery chart → | Fare & time → | Book

ENGINE	Range model (vehicle, load, speed, AC) plus the charger network. Charge stops are planned at places riders actually want to stop: food, restrooms.
PILOT	Maximum continuous driving time and rest stops built into the plan. An overnight allowance for multi-day trips.
OPEN	Return-leg pricing for one-way trips; tolls and interstate permits passed through at cost.

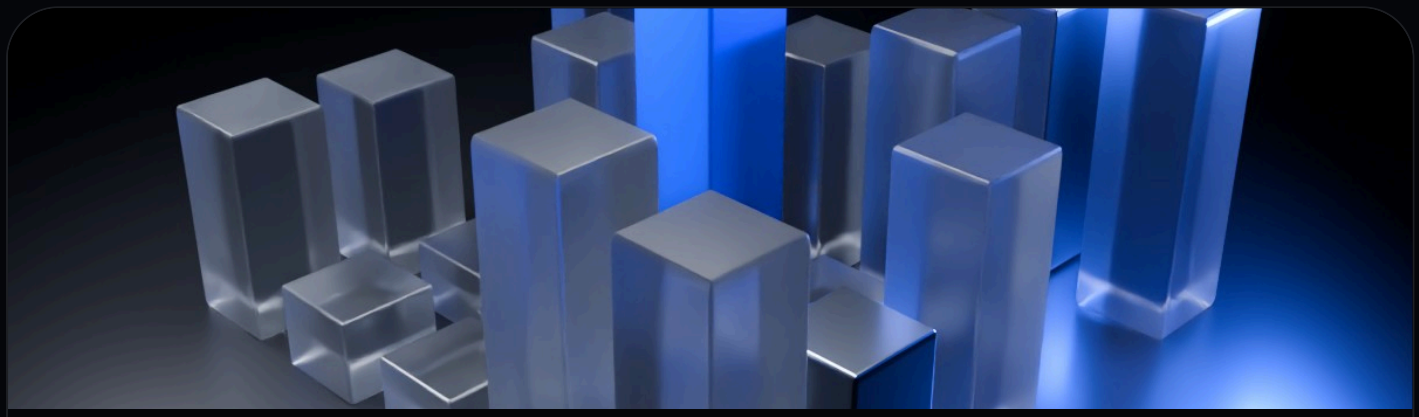

04 · SAGA TALES

Journeys with a story, door to door.

Browse Tales → | Hour-by-hour plan → | One fare → | Pilot all day → | Home

LAUNCH SET	Araku Valley (230 km) · Lambasingi Dawn (210 km) · Vizag Coast (60 km, half day). Seasonal: Araku in Oct–Feb, coast all year.
PARTNERS	Cafés, homestays and guides receive SAGA Tales guests, with optional revenue share. AP Tourism listing.
WHY	Fills weekend and off-peak fleet hours at a higher ticket.

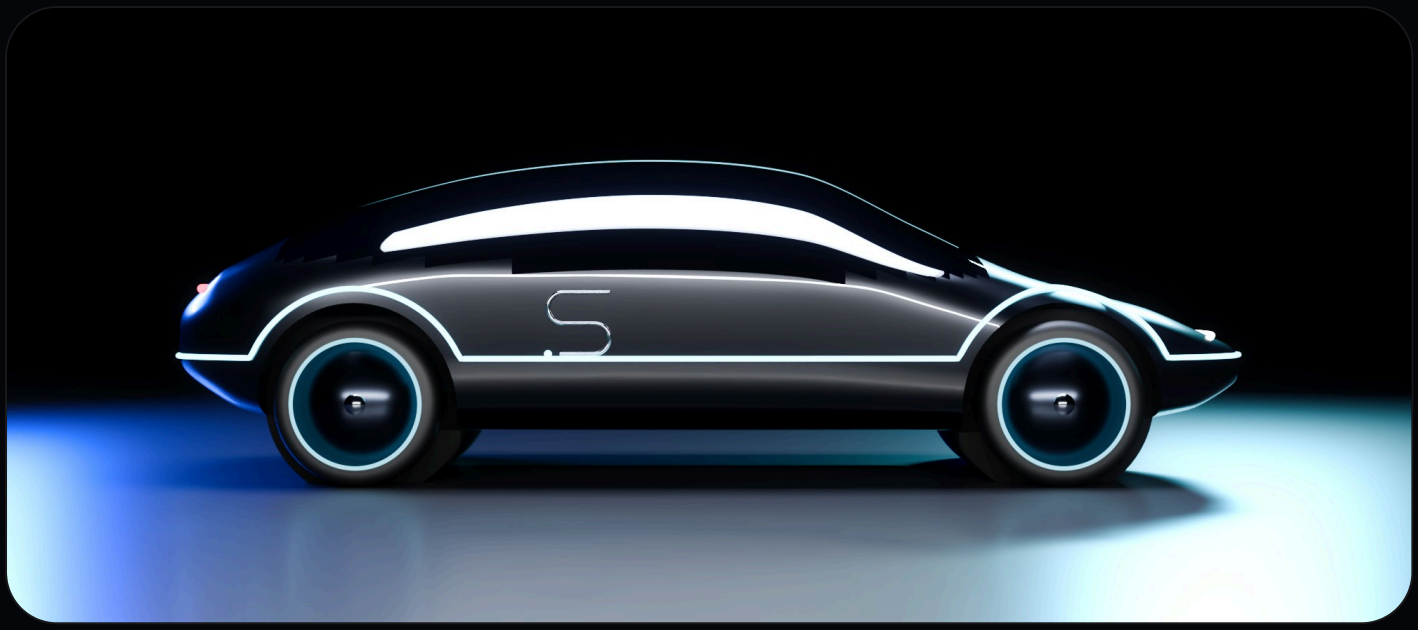

05 · SAGA BUSINESS & CAMPUS

Book a whole shift in one tap.

Roster (CSV / HRMS) → | Pick shift → | Auto-pool by area → | Approve → | Dispatch → | Monthly GST invoice

ROLES	Admin (billing, policies) · Manager (book for a team) · Rider (sees own rides). Campus adds Guardian.
POOLING	Groups riders by area and shift time, up to 3 per EV by default, with a maximum detour of 12 min.
POLICY	Night-shift safety rules (for example, drop order and escort policies for women employees) set per client policy and local law.
REPORT	Spend by cost centre, on-time %, and CO_2e avoided for ESG and BRSR reporting.

A work tool for salaried pilots, not a gig marketplace.

START OF SHIFT

Car, battery, checklist

Assigned car and depot, battery and range, and a four-point pre-trip checklist: tyres and lights, clean cabin, Secure 360 online, uniform. The shift can't start until every check is done.

TODAY'S PLAN

The whole day, in advance

Dispatch plans every job: Fly pickups with live flight status, Loop and Business pools, and the charging slot. No bidding, no surge chasing.

TRIP

Navigate and verify

Turn-by-turn on a dark map. The trip only starts when the rider's 4-digit trip code matches, so the right rider is in the right car.

END OF SHIFT

Rewarded for safe and on time

Trips, distance, on-time record, rating, safety-bonus progress and short training modules. The bonus rewards zero attention alerts, not trip volume.

One screen to run the region.

The backend console is where the dispatch, fleet, pilot, business, advertising, rewards and safety teams work. It uses the same tokens as the apps, tuned for dense, scannable data.

VIEW	WHAT THE TEAM DOES THERE
Overview	Live KPIs, a fleet map by status, alerts that need a decision, and 24-hour demand: locked rides against forecast on-demand and cars available.
Dispatch	Every upcoming ride with pilot, car and status, filterable by service. Flight watch moves pickups for delays and frees cars on cancellations.
Fleet	Battery and state per car, depot bay occupancy, and automatic reassignment when a car runs low.
Pilots	Roster, shift status, on-time record, ratings, attention alerts awaiting review, and training progress.
Business	Company, campus and partner accounts with rides, spend, CO_2e and invoice status.
Advertising	Placements, rate card, a campaign builder with a live reach and cost estimate, and running campaigns.
AURA	Points issued and redeemed, open liability, expiring points and the CO_2 method.
Safety	The Secure 360 alert queue. Every alert is reviewed by a person, and pilots can add context.

Useful offers at the right moment, never noise.

Advertising is a revenue line, but riders must never feel sold to. Ads are native, relevant to the trip, labelled and capped.

IN APP

Home partner card

One per session: stays, food, travel. Sample rate ₹180 CPM.

IN APP

Arrival offer

Shown after the drop at the airport, malls or a Tales stop, such as a lounge pass at Departures. Sample rate ₹420 CPM.

IN CAR

Rear-seat screen

Muted 15 s loops, with the ride ETA always visible. Sample rate ₹260 CPM.

TALES

Featured partner stop

Homestays, cafés and guides inside itineraries, on revenue share.

Rules

- At most one ad per screen, always labelled "Sponsored" or "Partner offer".
- No ads on live-ride, SOS, payment or trip-code screens, and none in any Campus or student view.
- Categories: travel, food, stays, retail and services. No betting, alcohol or political ads.
- Frequency capped per rider per day. Plasma and Nova riders can turn in-app ads off.
- All rates in the prototype are samples, to be set by SAGA.

Kilometres become light you can spend.

`CO₂e avoided = km × (petrol-cab factor - EV grid factor) · prototype uses a net 72 g/km placeholder`

The factor has to be verified, and the method published in the app, before launch. Claims are always "estimated CO_2e avoided compared with a petrol cab", never "zero emissions".

ION

0 – 1,999 ◈

Earn on every ride. Monthly AURA card to share.

PLASMA

2,000 ◈

Priority Loop slots and a free airport ride on reaching the tier.

NOVA

6,000 ◈

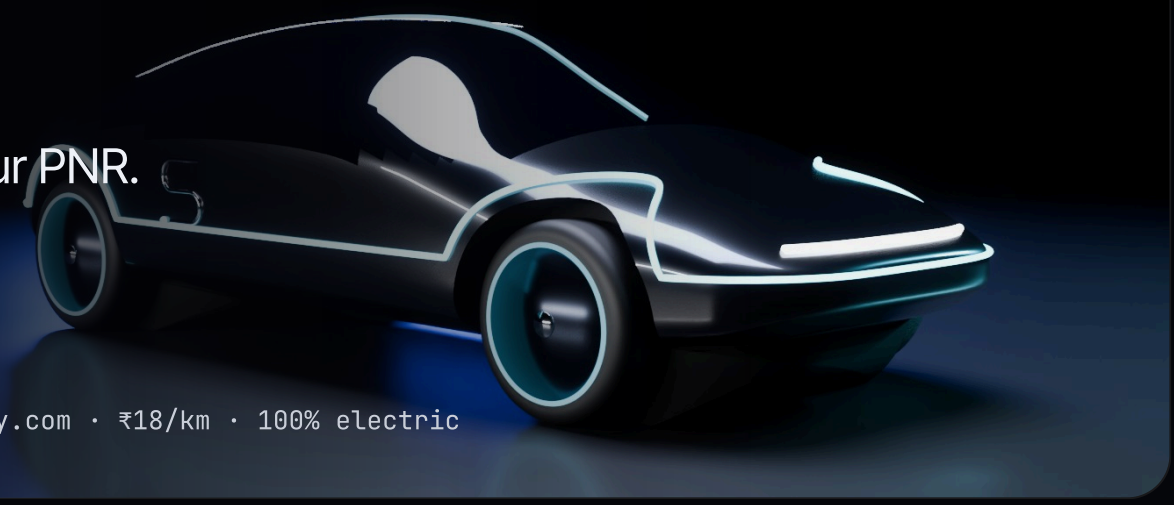

Premium upgrades and partner experiences. Your name on a planted mangrove.

Points expire 12 months after they are earned. Liability is capped by keeping the redemption value at or below 1.5% of fare.

Campaign: Arrive Ahead.

Lead with the cars at night, the light-lines on Beach Road, then the product truth: your ride is ready before you ask.

SAGA FLY

Type your PNR.
Sleep in.

sagamobility.com · ₹18/km · 100% electric

HEADLINE BANK

"Your cab was booked before you asked."

"₹18 a km. No surprises."

"Same pilot. Same minute. Every school day."

"Araku, without the bargaining."

"Every kilometre, electric."

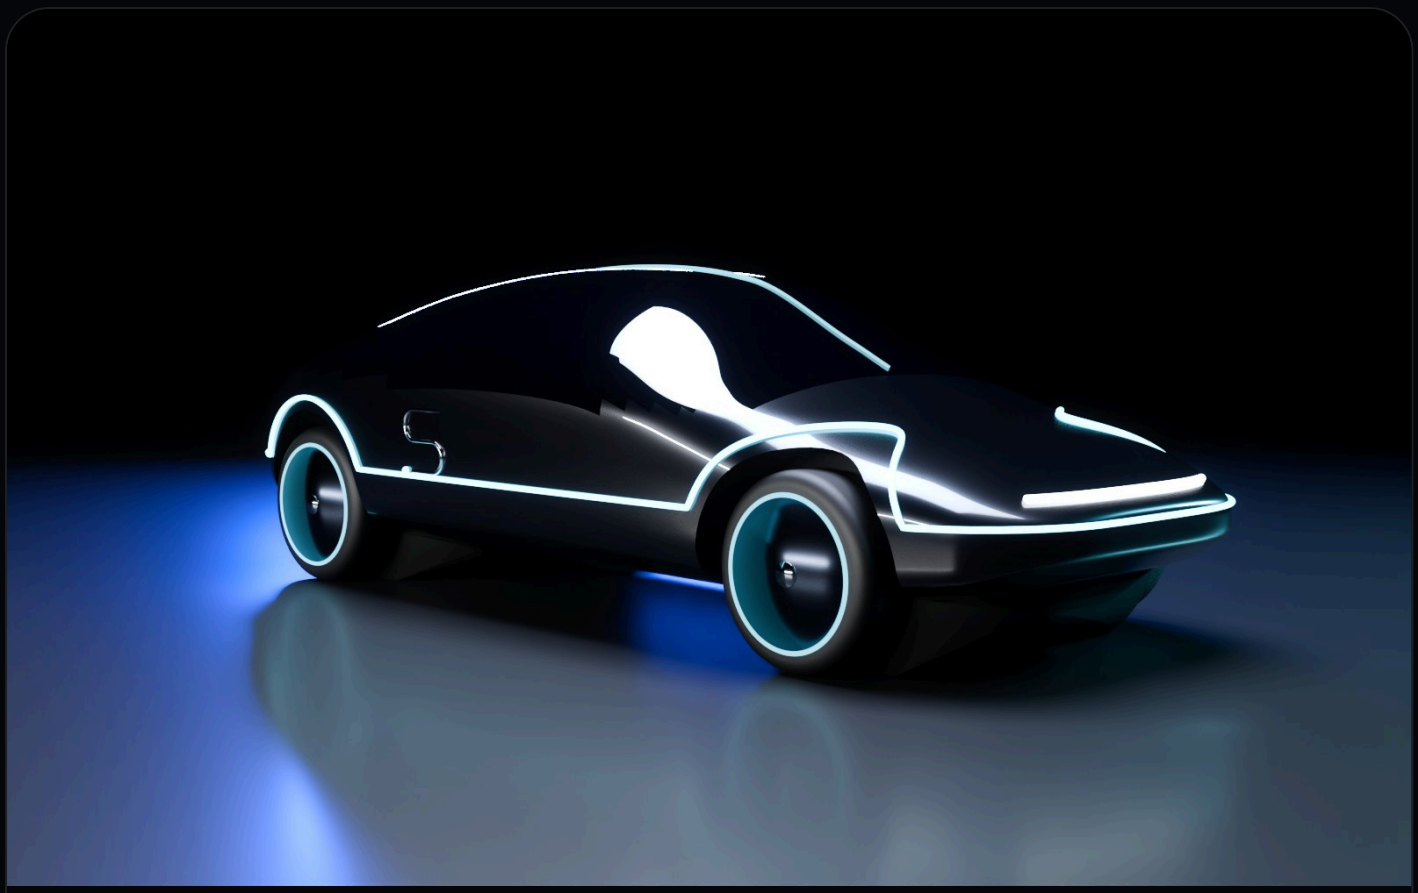

Phased plan

PHASE	ACTIONS	CHANNELS
0 · Fix Weeks 1–4	Org developer account, new store listing and screenshots, website Play badge, one airport name, Google Business Profile, Telugu strings.	Owned
1 · Glow Weeks 5–6	Night shoot of the fleet on Beach Road and the NH16 airport road. "The cars that glow" teaser reels. No offer, just intrigue.	Instagram, YouTube Shorts, local creators
2 · Arrive Ahead Weeks 7–10	SAGA Fly launch: billboard on the airport road, hotel concierge and travel-agent partners, a launch bonus of +200 ◈ on the first PNR booking.	OOH, Google Search ("airport cab Vizag"), Telugu radio
3 · Loop & Business Months 3–6	B2B sales to IT parks, pharma zones and schools. Campus ambassadors. Shared monthly AURA cards. Referral: give 200 ◈, get 200 ◈.	Direct sales, LinkedIn, WhatsApp
4 · Tales Season	Araku season launch with AP Tourism and homestays, plus a creator-led "48 hours of Tales".	Instagram, travel platforms

Metrics

Track from day one: on-time pickup %, share of rides pre-scheduled (PNR + Loop + Business), cost to acquire a rider by channel, Loop 3-month retention, fleet utilisation hours, AURA redemption rate, and rider NPS. Set targets after the first four weeks of real data.

The system on the street.

VEHICLE LIVERY · SAGA ONE

- Body: gloss "Midnight Ion" black wrap, no stickers or offer graphics.
- Light-line: Plasma beltline and wheel rings, the signature. **Confirm decorative lighting is compliant with RTO and Motor Vehicles rules** before fitting.
- Front doors: monogram 40 cm, Titanium vinyl.
- Rear: SΛGΛ wordmark plus fleet number, e.g. "ONE·2147".
- Pilots: carbon jacket with Plasma piping and a monogram on the chest.

App icon

Primary

Business

Pilot app

From manual to market.

Weeks 1–3	Sign off the identity. Turn this simulation into a Figma component library. Rebuild the store listing and website. Choose the PNR data provider.
Weeks 4–10	Build the Fly, Live ride and AURA MVP. Add UPI. Publish the CO_2 method. Fit Secure 360 to pilot cars, after a privacy review.
Weeks 10–16	Loop and Campus, then the Business console with CSV roster import and GST invoicing.
Season	Voyage charge planner and the first three Tales with partners.

OPEN DECISIONS FOR THE SAGA TEAM

- PNR data provider and its cost per lookup
- EV Premium rate (₹22/km is a sample in the prototype)
- Loop discount and skip-credit rules
- Verified CO_2 factor for AURA
- Return-leg pricing for Voyage
- Lighting compliance for the livery
- Ad rate card, categories and rear-seat screen hardware
- Pilot safety-bonus amounts and training plan
